

We believe that Maths should be based on a firm understanding of Mathematical concepts. We teach Maths through a wide range of practical experiences, problem solving, handling data and using computers.

Children are taught to select and use strategies to solve problems in a wide variety of every day contexts. We often use Maths in a cross-curricular context.

*Pupils make good overall progress. When they leave the school their standards are in line with National Averages – Ofsted 2012.*
